A Hand Rail is made of layers, also known as plies.

Finger joints on all plies

Finger Joint Hand Rail

- All plies utilize finger joint construction.
- Top plies are color matched in 42" lengths and longer.
- Bottom plies contain multiple finger joints.
- Rail is made with two or more plies

Top ply is free of finger joints*

Solid Cap Hand Rail

- The top ply will be free of finger joints.
*14-16' lengths of rail may contain up to one (1) visible butt joint on the cap.
- Bottom two plies utilize finger joint construction.

Engineered hand rail consists of core filler pieces that are wrapped in the profile of the hand rail. As such, engineered hand rail has SIDES instead of PLYS.

Butt joints instead of finger joints

Engineered Hand Rail

- Constructed using butt joints instead of finger joints.
- Solid wood filler pieces wrapped in profiled finish wood pieces.
